

Technology Experience Center

The Bell Techlogix Technology Experience Center (TEC) is designed to provide a world-class experience enabling immersive hands on exposure to the newest technology platforms and customized solutions in a uniquely designed environment created to foster learning.

Environment

The innovative space showcases an individualized and differentiated instruction environment which is emerging in classrooms all over the world.

Solutions Experts

Your team will experience and participate in a real time collaborative environment along with our team to identify solutions that fit your curriculum technology requirements leveraging our combined experience and best practices.

With over 30 years experience serving education in conjunction with our collection of expert resources and partners, the TEC is a powerful resource for your envisioning, planning and implementation.

Bell Techlogix provides each client with a customized visit to the Technology Experience Center, offering your organization 5 unique experiences.

Strategy Session

In this session you will discuss your current IT environment, curriculum and driving objectives. Based on your specific requirements, you will then see proposed technology solutions in action. This is accomplished through demos and potential scenarios tailored to your needs. The outcome will be a clear vision and next steps in your road to reach your technology goals.

Designed for Leadership: 1/2 to Full Day

Design Session

This custom session focuses on your curriculum and district objectives and aligns them with specific scenarios to help you meet and exceed your goals. Our engineering experts will provide architectural guidance, consultation on best practices and risk analysis.

Designed for CTO's, architects and senior members of your technology team: Full Day

Interactive Experience

Stop by and have interactive, hands on fun interacting with a wide variety of Laptops, Desktops, Phones and Tablets. Imagine what the wireless technologies, hardware and software, could provide to your schools, students and teachers. Discussions and solutions are only a play day away.

Designed for any technologist: 1 Hour - 1/2 Day

Hands-on Immersion

Bell Techlogix will customize a session where you will spend time in a facilitated, hands-on learning environment so that you can experience your own solutions first hand.

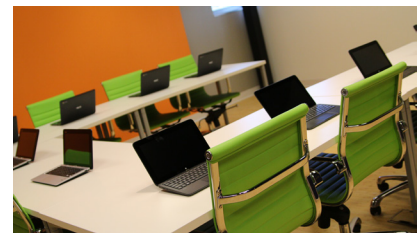

Proof-of-Concept Session

Bell Techlogix will assist in the development of one or more POC systems to be considered before your organization settles on the architecture and design of the final implementation.

Development of a POC system provides us with many benefits including:

- Clear expectations of the requirements
- Understanding of the capabilities and limitations of new technologies
- Ability to assess design decisions early in the process
- Ability for the customer to visualize early on the look-and-feel of the solution
- Reduction in the overall risk of project failure
